

**Hardy Filtration**

*Integrated filtration solutions: air, water & oil*

## PaintStop Fiberglass Arrestors

**MSA22**

### PaintStop Paint Arrestors

**PaintStop Paint Arrestors protect the spray booth exhaust system, as well as the outside environment, while reducing paint booth operating costs.**

*PaintStop Paint Arrestors* are widely used because they deliver many advantages:

- » High-lofted fibers trap heavy, wet paint particles as well as dry contaminants before they go up the stack and into the fans – reducing fan maintenance and operating costs.
- » They hold unparalleled amounts of solids before needing to be changed – resulting in less downtime and lower paint arrestor costs.
- » They handle any of the new coatings – allowing you to stay out front of the competition.

**PaintStop Paint Arrestors remain favorites in quality paint-finishing operations worldwide, reassuring your customers that when it comes to their best interests, you only use the best.**

### MSA22 - Description

***Down draft media of choice in North American and European markets.***

MSA-22 fiberglass media is constructed using 22 grams of fiberglass media per square foot. The fibers are formed into progressively denser layers. Fiberglass media is ideal for capturing paint overspray due to its ability to maintain an open outer layer. It is this initial outer layer that allows the entire depth of the media to hold paint particulate and not “surface load” like many overspray collectors.

The media is solid yellow and has white backing on the downstream side.

Fiberglass media is ideal for shipping, the media has 100% memory when compressed, therefore the rolls are tightly wound and when unrolled to use in your booth, the filter regains its 2½” loft.

MSA-22 fiberglass media comes in roll form of 300 foot lengths and various widths to accommodate most paint booths.

If your downdraft booth uses a pit, measure the width of the pit to find the appropriate roll, or check our booth guide.

To change the media, simply unwind the roll to the proper length and cut.

## Description

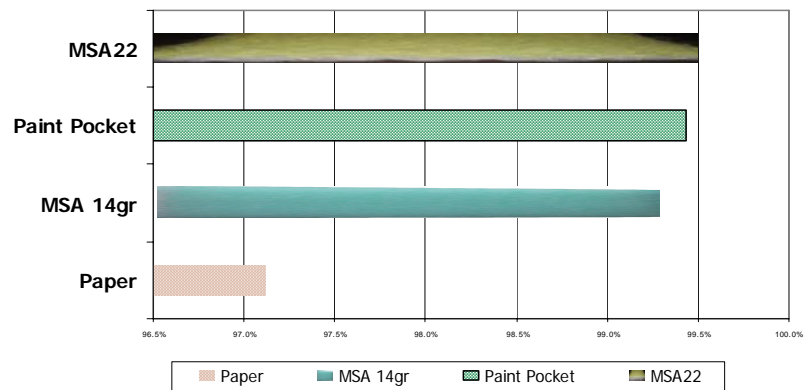

Standard dimensions

DIMENSIONS	PART NO.	PACKING
25" X 300' x 2 1/2	MSA22-25300	1
28" X 300' x 2 1/2	MSA22-28300	1
30" X 300' x 2 1/2	MSA22-30300	1
32" X 300' x 2 1/2	MSA22-32300	1
36" X 300' x 2 1/2	MSA22-36300	1
40" X 300' x 2 1/2	MSA22-40300	1
42" X 300' x 2 1/2	MSA22-42300	1

## Comparison of the PaintStop MSA22 versus other popular floor exhaust products.

As one can see from the comparison charts the MSA22 has the highest efficiency and although it does not have the highest paint holding capacity, it is the **best value for the cost of pound of paint retained.**

Efficiency

Another very important point that has to make is the cost of shipping. The other products on the market whether it be paper or polyester can be very bulky to ship. Because Fiberglass has memory it can be compressed into a very tight roll for shipping.

**Your savings on freight costs can be 5-7 times less than that of shipping the other products.**
